

March 28, 1942

Mr. J. T. Leigh
Cedar City, Utah

Dear Sir:

REL: COAL CREEK DISTRIBUTION

Due to National Defense conditons, this office is constantly requested to furnish information relative to the number of acres irrigated under various canals throughout the State of Utah. You are, therefore, instructed to collect sufficient data during the current season and to incorporate it in your report at the end of the irrigation season the number of acres actually irrigated under each canal diverting from the stream under your jurisdiction. Should there be more than one canal operated by a given company, such canals may be grouped into one in the report. The tabulation should also contain for each canal the discharge and the duty of water. It would be well in collecting the data for this report from the respective companies involved to determine the approximate percentage of various crops irrigated.

Yours very truly,

Ed. H. Watson
STATE ENGINEER.
